## Balluff Distributors and Stockists

Balluff are one of the worlds leading manufacturers of proximity sensors.

We have recently restructured our catalogue to make it easier to find Balluff products by organising our ranges by brand.

Our range has also been expanded to include Balluff's Global Prox range of inductive proximity sensors which are more competitive in volume compared to the traditional range. We have also introduced some new barrel photoelectric switches.

**M18 Inductive proximity switches**

**BOS18KF Barrel photoelectric**

*For more information on these or other Balluff sensors, please contact our sales department.*
