

We have an add on service providing custom design and manufacturing solutions for small to medium volume products.

We take a professional approach to design building specialist test rigs to ensure product reliability such as our alternator simulator for 12 and 24V loads and recently a test vehicle for Battery management evaluation.

Example products:

- Industrial boiler controls
- Air conditioning control
- High current 180A pcb assemblies
- Rail timers
- Rail power supplies 40 to 120Vdc
- Limit switch assemblies with cable
- Custom switch assemblies for Agricultural machinery
